

Mahlatse Mokgawa – Developer Blueprint

A living roadmap documenting my transition from financial services into software development and my progression toward becoming a fullstack developer.

Starting Point (T1)

Background

- Banking and financial services experience
- Strong attention to detail
- Compliance and process-driven thinking
- Customer service experience

Technical Starting Point

- Basic HTML
- Basic CSS
- Limited JavaScript exposure

Strengths Brought Into Tech

- Problem-solving
- Structured thinking
- Professional communication
- Documentation discipline

Current State (T2)

Current Skills

- ✓ HTML
- ✓ CSS
- ✓ Git
- ✓ GitHub
- ✓ Netlify Deployment
- ✓ Responsive Design
- ✓ Basic JavaScript

Current Projects

- Portfolio Website
- Netflix Clone
- To■Do List Application
- Developer Playbook

Evidence

- GitHub repositories
- Live deployments
- Project documentation

Target State (T3)

Technical Goals

- Advanced JavaScript
- APIs
- React
- Component-based architecture
- Backend fundamentals
- Databases

Professional Goals

- Build production-ready applications
- Freelance web development
- Contribute to open source
- Secure developer opportunities

Growth Roadmap

T1 → HTML Foundations → CSS Layouts → Responsive Design → JavaScript Fundamentals → Git & GitHub → Project Development → Portfolio Building → T2 → React → APIs → Backend Development → Full Stack Applications → T3

Personal Development Philosophy

I believe growth comes from consistent practice, project-based learning, and continuous reflection. My goal is not only to learn technologies but to develop systems for learning, problem-solving, and delivering value through software.

Blueprint Evolution

T1 Version

- Learning HTML
- Following tutorials
- Static pages
- No deployment
- Individual skills

T2 Version

- Building projects
- Solving problems
- Interactive websites
- Live applications
- Integrated workflow

Next Evolution (T3)

- React applications
- API integration
- Full-stack projects
- Professional-grade portfolio
